**UNESCO Bangkok Press Release No.2008-06**

***Celebrating Innovative ICT in Education Practices: From Idea to Impact***

*Imperial Queen's Park Hotel, Bangkok, Thailand, 24-26 June 2008*

*"If students do not learn the way we teach, then let us teach the way they learn."*

That is what many educators have been trying to do through the use of Information and Communication Technologies (ICT).

With the support of the Japanese Funds-in-Trust, the UNESCO ICT in Education Innovation Awards 2007-2008 was recently launched to recognize innovative ICT in education practices and encourage and enhance even more educational innovations.

The results of this search for excellence will be showcased at a special event, *Celebrating Innovative ICT in Education Practices: From Idea to Impact*, on 24-26 June in Bangkok. To mark the spirit of innovativeness, the event features an award ceremony with the three top winners to receive laptops as prizes sponsored by Intel. Participants will also be actively engaged in the show and tell exhibition, a meeting for key ICT in education players, and training workshops based on two winning projects.

Among the 100 participants expected to attend the event are the winners of the awards, high-level officials from ministries of education in the region, leaders of major IT industries, school administrators, principals and teachers.

UNESCO believes that integrating ICT into education can help to bring quality education to everyone, everywhere – a key goal of the Education for All initiative. The citizens of the future must be equipped with sufficient knowledge to keep up with technological advances and demands of the 21<sup>st</sup> Century.

**Tentative programme**

Tuesday, 24 June, 8.30 am – 7.00 pm
